Hire Right

AI-powered predictive hiring for Jackson & Jackson HR Digital

From raw applicant data to a governed, conversational hiring decision — one connected journey on Databricks.

— THE PROBLEM

People are Jackson & Jackson's most critical asset — and hiring is slow, subjective, and costly to get wrong.

- ◆ Nearly **100,000 resumes a month — 1.2–2M a year** — far more than any team can screen consistently by hand, so strong candidates are lost in the pile.
- ◆ **Every hire matters, senior leaders most of all.** A wrong hire is wasteful — it drains productivity, disrupts the team, and hits the bottom line.
- ◆ Decisions rest on **gut feel and inconsistent scorecards**, creating bias and compliance exposure in a regulated industry.
- ◆ Applicant data, resumes, and analytics live in **disconnected tools** — no single, governed source of truth.

Jackson & Jackson is modernizing HR on a single, governed Data & AI platform — and chose Databricks. **Hire Right** is the flagship use case: hire better, and at scale, with ML and AI.

— THE OUTCOME — LEAD WITH IMPACT

Higher-quality hires, faster — fair and defensible.

~30%

Higher quality of hire

North-star KPI — fewer mis-hires, measured by first-year retention

60%

Faster time-to-fill

Ranked shortlists on day one, not week six

1.2M+

Resumes triaged a year

Consistent screening at 100K+/month, ranked automatically

100%

Auditable & consistent

Governed scoring, masked PII, tracked notes

Quality of hire is the north-star metric; time-to-fill and screening throughput prove it operationally — all in KPIs TA and the CHRO already report on. Projected impact for the J&J HR Digital prototype.

— WHAT THE HR TEAM GETS

A decision cockpit for every requisition.

Ranked candidates

Every applicant scored across 8 weighted dimensions with a clear total & stage.

Data-science recommendation

One click runs the ML prediction and returns a hire recommendation with rationale.

Resume Q&A (RAG)

Ask about any candidate's experience — grounded in their actual resume.

Genie analytics

"Who are the top 3 for the CPO role?" answered instantly over governed data.

HR notes

Add durable, audit-trailed annotations to a candidate record — saved to Lakebase.

AI offer letter

One click drafts a salaried offer letter and sends it via the agent's mailer tool.

One connected journey — data to decision on Databricks.

01 • FOUNDATION

Lakeflow + Unity Catalog

Synthetic applicant data ingested with Lakeflow, refined Bronze→Silver→Gold, governed with lineage, PII masking & tags.

02 • SERVE

Lakebase

Governed tables synced to a low-latency Postgres layer that powers the app — and stores HR annotations.

03 • PREDICT

Predictive ML

An MLflow hire model on Model Serving returns a hire / no-hire decision from the scoring features.

04 • AGENT

AI Agent

A ResponsesAgent orchestrates tools — Genie, resume RAG, ML scoring, and email — grounded in your data.

05 • EXPLORE

Genie Room

Recruiters ask questions in natural language over governed data — no SQL required.

06 • DELIVER

Databricks App

A single HR workspace: scoring, recommendations, resume viewer, Genie Q&A, and candidate notes.

— ARCHITECTURE · KEY TECHNICAL COMPONENTS

End-to-end on Databricks — data to decision.

A governed medallion, ingested with Lakeflow.

INGEST

Lakeflow

Synthetic resumes + candidate/job CSVs land in UC Volumes and are read incrementally with Lakeflow (read_files / Auto Loader).

BRONZE

Raw

As-ingested, full-fidelity and replayable — the immutable source of truth.

SILVER

Clean & governed

Typed candidates & job requirements; PII masked; data-quality checks applied.

GOLD

Analytics-ready

candidate_scoring_summary — joined, scored features powering ML, Genie & the app.

Governance you can see — PII masked in place.

- ◆ Phone & email tagged as PII in Unity Catalog with sensitivity levels.
- ◆ Dynamic column masking — non-admins only ever see ***-***-0505.
- ◆ Lineage & data-quality tracked end-to-end, Bronze→Gold.

The same governance that protects candidates makes every hiring decision auditable.

Lakebase turns the lakehouse into an app backend.

- ◆ Gold candidate & job tables synced Delta→Postgres for millisecond reads.
- ◆ HR notes write to a native **candidate_annotations** table — add or delete inline.
- ◆ The whole cockpit is served from Lakebase; the app connects via OAuth.

Analytical lakehouse + operational Postgres, governed together in Unity Catalog.

The screenshot displays the 'Hire Right' application interface. At the top, the header includes the 'Hire Right' logo, 'Jackson & Jackson · AI-Powered Hiring', and 'Powered by Databricks Data & AI'. Navigation buttons for 'Genie One', 'Ask Genie', and 'Data Flow' are present. The main content area shows a candidate profile for Marcus Thompson, a Senior Director of Compensation at Eli Lilly in Indianapolis, IN. His profile includes a 'TOTAL SCORE' of 88.6 and buttons for 'Show Resume' and 'AI-Powered Offer Letter'. Below this, a 'SCORE BREAKDOWN' section lists various factors with their scores and percentages: Education (90, 10%), Experience (92, 20%), Leadership (86, 20%), Certifications (80, 10%), Skills Match (100, 10%), Industry Relevance (95, 10%), and Interview (100, 10%). A 'DS HIRE RECOMMENDATION' section includes a 'Generate Recommendation' button and a message about missing scores for interview and culture fit. A red callout box highlights the 'HR notes — add & delete inline, committed to Lakebase (Postgres)' feature. The bottom section shows 'HR NOTES' with a private annotation: 'I would recommend hiring or recycling' by HR Manager on Jul 9, 2026, 4:38 PM. A footer bar at the bottom reads 'Jackson & Jackson HR Digital · Hire Right · Built on Databricks'.

HR notes — add & delete inline, committed to Lakebase (Postgres)

I would recommend hiring or recycling
HR Manager · Jul 9, 2026, 4:38 PM

Add a note about Marcus Thompson

Three models, tracked and compared in MLflow.

- ◆ LogReg, Random Forest & Gradient Boosting trained on the scoring features.
- ◆ Every run logged to MLflow — metrics, params & datasets, fully comparable.
- ◆ Best model promoted to **@champion** and served on a scale-to-zero endpoint.

Jackson & Jackson HR Digital · Hire Right · Built on Databricks

🏠

The agent works in the open — live tool calls.

- ◆ A ResponsesAgent orchestrates tools: Genie, resume RAG, ML scoring, email.
- ◆ Tool calls **stream live into the app** — HR watches each step complete.
- ◆ Grounded in governed data, so every answer is explainable.

The screenshot displays the Hire Right HR application interface. At the top, the header includes the 'Hire Right' logo, the text 'Jackson & Jackson · AI-Powered Hiring', and 'Powered by Databricks Data & AI'. Navigation buttons for 'Genie One', 'Ask Genie', and 'Data Flow' are visible. The main content area shows a candidate profile for Marcus Thompson (CO14), Senior Director of Compensation at Eli Lilly in Indianapolis, IN. A circular progress indicator shows a total score of 88.6. Buttons for 'Show Resume' and 'AI-Powered Offer Letter' are present. Below the profile, a 'SCORE BREAKDOWN' section lists 8 factors: Education (90, 10%), Experience (92, 20%), Leadership (86, 20%), Certifications (80, 10%), Skills Match (pending), Industry Relevance (95, 10%), Interview (pending), and Culture Fit (pending). A 'DS HIRE RECOMMENDATION' section shows a score of 80, 95, 95 and a 'Generate Recommendation' button. Below this, a list of tool calls is shown: 'predict_hiring_score' (Completed) and 'search_resumes' (Completed). A summary of the recommendation is provided, stating that Marcus Thompson is a Senior Director of Compensation at Eli Lilly with 14 years of pharmaceutical industry experience, highly aligned to JRO03. At the bottom, there is a text input field for follow-up questions and a 'Send' button.

Genie answers in plain English — governed.

- ◆ Recruiters ask questions in natural language — no SQL required.
- ◆ Genie generates & runs governed SQL, and can show its work.
- ◆ Embedded in the app *and* available as an agent tool.

The image displays two overlapping screenshots. The background screenshot shows the 'Hire Right' app interface for 'Jackson & Jackson - AI-Powered Hiring'. It features two job listings: 'Director of Human Resources' (JR001) with a salary range of \$175K – \$225K and 12 applicants, and 'Director of Compensation & Benefits' (JR003) with a salary range of \$165K – \$210K and 3 applicants. The foreground screenshot shows the 'Genie Analytics' chat interface. It contains a red user message asking for the average total score for JR001 candidates, followed by a green system response showing the average score of 70.8 and a 'Show SQL' button. Below this, there are several suggested questions in blue bubbles. A second red user message asks 'what is JR001', and a green system response explains that JR001 refers to the Director of Human Resources position at Jackson and Jackson, with a salary range of \$175K–\$225K. At the bottom, there is an input field for asking data questions and a 'Powered by Databricks Genie · J&J HR Analytics Space' footer.

Powered by Databricks Genie · J&J HR Analytics Space

Every agent run is traced and evaluated.

- ◆ MLflow tracing captures each tool call, token count & latency.
- ◆ LLM-as-judge scores tone & consistency before the agent ships.
- ◆ Full observability for debugging and production monitoring.

One workspace HR actually wants to use.

- ◆ Ranked candidates, 8-factor scores and a one-click DS recommendation.
- ◆ Resume viewer, Genie Q&A, HR notes and AI-drafted offer letters.
- ◆ Served fast from Lakebase — a single, governed HR cockpit.

The screenshot displays the 'Hire Right' HR dashboard for a candidate named Marcus Thompson. The interface is clean and modern, with a dark header bar containing the 'Hire Right' logo and navigation links for 'Genie One', 'Ask Genie', and 'Data Flow'. Below the header, there are tabs for 'Candidates' and 'Job Openings'. The main content area is divided into several sections:

- Candidate Profile:** Features a profile card for Marcus Thompson (CO14), Senior Director of Compensation at Eli Lilly in Indianapolis, IN. It includes a 'Show Resume' button and an 'AI-Powered Offer Letter' button. A circular progress indicator shows a total score of 88.6.
- Score Breakdown:** A section titled '8-factor weighted assessment' showing scores for various factors: Education (90), Experience (92), Leadership (86), Certifications (80), Skills Match (pending), Industry Relevance (95), Interview (pending), and Culture Fit (pending). Each factor has a corresponding bar chart and a percentage weight.
- DS Hire Recommendation:** A section with a 'Generate Recommendation' button. It contains a message stating that Marcus Thompson has missing scores for interview and culture fit, and a text input field for providing scores or asking follow-up questions.
- HR Notes:** A section for private annotations on Marcus Thompson, saved to Lakebase. It shows a note from an HR Manager dated July 9, 2026, recommending hiring or recycling.

The bottom of the dashboard features a footer with the text 'Jackson & Jackson HR Digital · Hire Right · Built on Databricks' and a small red logo.

— WHY DATABRICKS

Data, AI, and the app — on one governed platform.

- ◆ **No integration tax:** ingestion, governance, ML, Gen AI, analytics, and the app all live together.
- ◆ **Lakebase** turns governed lakehouse tables into a low-latency application backend — no separate database to sync and secure.
- ◆ **Unity Catalog** governs data *and* AI, so the whole solution is auditable end-to-end.
- ◆ **Faster to value:** this entire prototype was built as one connected journey, not stitched from point tools.

— THE ASK

Let's hire right, together.

A working, governed, AI-powered hiring solution — ready to pilot on a live requisition and prove the numbers on your data.

- ◆ Pilot on one open role and baseline time-to-fill & quality of hire
- ◆ Extend the model and Genie room to your historical hiring data
- ◆ Roll the app out to the TA team behind Unity Catalog governance
